Swimming pool heat pump systems

AS 5352:2022

This Australian Standard ® was prepared by EL-058, Energy Efficiency for Swimming Pool pumps. It was approved on behalf of the Council of Standards Australia on 06 October 2022.

This Standard was published on 28 October 2022.

The following are represented on Committee EL-058:

- Australian Industry Group
- Consumer Electronics Suppliers Association
- Department of Industry, Science, Energy and Resources
- Energy Networks Australia
- Engineers Australia
- International Copper Association Australia
- Pump Industry Australia
- Swimming Pool & Spa Association of Australia

This Standard was issued in draft form for comment as DR AS 5352:2022.

Preface

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee EL-058, Energy Efficiency for Swimming Pool Pumps.

The objective of this document is to specify the procedures for determining the heating and cooling capacity, coefficient of performance and installation, and sizing of residential and commercial swimming pool heat pump systems.

The terms “normative” and “informative” are used in Standards to define the application of the appendices to which they apply. A “normative” appendix is an integral part of a Standard, whereas an “informative” appendix is only for information and guidance.

Contents

Preface	ii
Introduction	v
1 Scope and general	1
1.1 Scope.....	1
1.2 Application.....	1
1.2.1 Intended users.....	1
1.2.2 Application of NF 414 and ANSI/AHRI 1161.....	1
1.3 Normative references.....	1
1.4 Terms and definitions.....	2
2 Rating requirements — Operating conditions	4
3 Test facility	5
3.1 Scope.....	5
3.2 Test chamber.....	5
3.2.1 General.....	5
3.2.2 Air temperature and circulation.....	5
3.2.3 Radiant heat sources.....	5
3.2.4 Electricity supply.....	6
3.3 Test system.....	6
3.3.1 General.....	6
3.3.2 Water flow rate.....	6
3.3.3 Location of water temperature sensors.....	6
3.3.4 Location of air temperature and humidity sensors.....	7
3.4 Measurement accuracy.....	9
3.4.1 General.....	9
3.4.2 Air temperature.....	10
3.5 Water temperature.....	10
3.5.1 General.....	10
3.5.2 Water inlet temperature.....	10
3.5.3 Water temperature rise.....	10
3.5.4 Water pressure drop.....	11
3.6 Electrical power.....	11
3.7 Flow rate.....	11
3.8 Test procedure.....	11
3.9 Data to be recorded.....	11
3.10 Calculation of capacity, COP and EER.....	12
3.11 Reporting of results.....	13
4 Instructions and nameplate data	13
4.1 Nameplate.....	13
4.2 Instructions.....	13
5 Product conformity	15
6 Calculation of pool heating load and heat pump selection	15
6.1 General.....	15
6.2 Evaporation heat loss.....	16
6.3 Radiation heat loss.....	18
6.4 Convection heat loss.....	19
6.5 Solar radiation heat gain.....	20
6.6 Effect of pool covers on heat loss.....	20
6.6.1 General.....	20
6.6.2 Evaporative heat loss with cover.....	20
6.6.3 Radiation heat loss with cover.....	21
6.6.4 Convective heat loss with cover.....	21
6.6.5 Solar radiation heat gain with a cover.....	21
