Australian Standard®
Worksafe Australia National Standard

**Workplace injury and disease
recording standard**

This Australian Standard was prepared by a working party of the National Occupational Health and Safety Commission (Worksafe Australia) and endorsed by the National Commission on 16 May 1989. The standard was subsequently endorsed by Standards Australia Committee SF/2, Industrial Accident Records. It was approved on behalf of the Council of Standards Australia on 20 March 1990 and published on 11 June 1990.

The following interests are represented on Committee SF/2:

Association of Employers of Waterside Labour
Australian Bureau of Statistics
Australian Gas Association
Australia Post
Confederation of Australian Industry
Department of Administrative Services—Australian Construction Services
Department of Industrial Affairs, Qld
Department of Labour and Industry, Tasmania
Department of Labour, Vic.
Department of Occupational Health Safety and Welfare, W.A.
Electricity Supply Association of Australia
Federal Chamber of Automotive Industries
Master Builders Construction and Housing Association of Australia
Metal Trades Industry Association of Australia
National Safety Council of Australia (Federal Secretariat)
Safety Institute of Australia
Telecom Australia
WorkCover Authority, N.S.W.

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto. Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by Worksafe Australia, and published by Standards Australia under the terms of the Memorandum of Understanding between the two organizations using the accredited organization's method. It supersedes AS 1885—1976, *Recording and measuring work injury experience*, and HB16, *Describing and reporting occupational injuries and disease*.

The National Occupational Health and Safety Commission is a tripartite body established by the Commonwealth Government to develop, facilitate and implement a national occupational health and safety strategy.

This includes Standards development, the development of hazard-specific preventive strategies, research, training, information collection and dissemination and the development of common approaches to occupational health and safety legislation.

In September 1988, the draft Workplace Injuries and Disease Recording Standard was released for public comment in accordance with s.38(4) of the National Occupational Health and Safety Commission Act 1985 (Commonwealth).

The National Commission, having considered public comment on the draft document, now declares a final Workplace Injury and Disease Recording Standard pursuant to s.38(1) of the National Occupational Health and Safety Commission Act.

The Standard has been approved by the Standards Australia Committee on Industrial Accident Records as Part 1 of a multi-part Standard dealing with the measurement of occupational health and safety performance. The remaining parts of the Standard are yet to be prepared.

It should be noted that national Standards declared by the National Commission are instruments of an advisory character, except where a law, other than the National Occupational Health and Safety Commission Act, or an instrument made under such a law, makes them mandatory.

Major areas where this Standard differs from AS 1885—1976 include —

- (a) splitting the recording form into sections dealing with data to be recorded for all injury and disease occurrences, and data which need be recorded only for lost time injury and disease occurrences;
- (b) details of the employer are no longer recorded on each form, and are recorded once for each recording period and unit; and
- (c) the details of injury or disease are recorded in a more precise manner, and the facility for encoding certain data has been provided.
