

Australian/New Zealand Standard™

**Audio, video and similar electronic
apparatus—Safety requirements
(IEC 60065:2014 (ED. 8.0) MOD)**

AS/NZS 60065:2018

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE-001, Safety of Electronic Equipment. It was approved on behalf of the Council of Standards Australia on 8 January 2018 and by the New Zealand Standards Approval Board on 20 December 2017.
This Standard was published on 12 February 2018.

The following are represented on Committee TE-001:

Australian Chamber of Commerce and Industry
Australian Communications and Media Authority
Australian Industry Group
Australian Information Industry Association
Business New Zealand
CHOICE
Communications Alliance
Consumer Electronics Association of New Zealand
Consumer Electronics Suppliers Association
Department of Climate Change and Energy Efficiency
Electrical Compliance Testing Association
Electrical Regulatory Authorities Council
Energy Efficiency and Conservation Authority of New Zealand
Engineers Australia
Free TV Australia
National Retail Association
New Zealand Testing Interests
Worksafe New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 60065:2017.

Australian/New Zealand Standard™

Audio, video and similar electronic apparatus—Safety requirements (IEC 60065:2014 (ED. 8.0) MOD)

Originated in Australia as AS 3250—1982.
First joint edition AS/NZS 3280:1995.
Previous edition AS/NZS 60065:2012.
Fourth edition 2018.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE-001 Safety of Electronic Equipment.

AS/NZS 60065:2012, *Audio, video and similar apparatus—Safety requirements* (IEC 60065, ED. 7.2 (2011) MOD) will also remain current for 2 years from the publication of AS/NZS 60065:2018, *Audio, video and similar electronic apparatus—Safety requirements (IEC 60065:2014 (ED. 8.0) MOD)*, and after this time will be superseded by AS/NZS 60065:2018. Regulatory authorities that reference these Standards in regulation may apply these requirements at a different time; users of this Standard should consult with these authorities to confirm their requirements.

The objective of this Standard is to provide Australian and New Zealand electrical and electronic industries with minimum safety requirements for electrically powered equipment intended for the reception, generation, recording or reproduction of audio, video and associated signals.

This Standard is an adoption with national modifications and has been reproduced from IEC 60065:2014 (ED.8.0), *Audio, video and similar apparatus—Safety requirements*, including Corrigendum 1 (2015), which has been added at the end of the source text. IEC Corrigendum 2 (2016) has not been included as it comprises a correction to Clause 12.7.1 that has been incorporated into Appendix ZZ. The Australian/New Zealand variations are listed in Appendix ZZ. This Standard has been varied from the IEC Standard as indicated to take account of Australian/New Zealand conditions.

This Standard is structured as follows:

- (a) Australian/New Zealand Preface.
- (b) IEC 60065:2014 (unedited from the scope to the final clause of the source document including Corrigendum 1).
- (c) Appendix ZZ—Australian/New Zealand variations to the source document.

The variations listed in Appendix ZZ address Australia/New Zealand issues including the following:

- (i) Addition of references to relevant normative Australian/New Zealand Standards.
- (ii) Alternate requirements for thermoplastic materials
- (iii) Appropriate tests of AS/NZS 3112.
- (iv) Australian/New Zealand requirements for flexible cords.
- (v) Requirements for stability of television receivers.
- (vi) Alternate resistance to fire tests.
- (vii) Change Table 21 flammability category.
- (viii) Reference to Australian Telecommunications Labelling Notice (Annex B).
- (ix) Additional requirements for batteries.
- (x) Abnormal conditions and single fault conditions output voltage test for external power supplies, docking stations and other similar devices.

The essential safety requirements in AS/NZS 3820, *Essential safety requirements for electrical equipment*, that could be applicable to electrically powered equipment intended for the reception, generation, recording or reproduction of audio, video and associated signals are covered by this Standard.

The variations described in Appendix ZZ form the Australian and New Zealand variations for the purposes of the CB scheme for recognition of testing to standards for safety of electrical equipment.

As this Standard is reproduced from an International Standard, the following applies:

- (A) In the source text ‘this International Safety Standard’ should read ‘this Australian/New Zealand Standard’.
- (B) A full point should be substituted for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific standards.

In cases where Australian or Australian/New Zealand Standards are modified-text adoptions of international normative reference Standards, references to those International Standards are required by Appendix ZZ to be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>
