

Australian Standard™

**Paints and related materials—Pavement  
marking materials**

**Part 2: Thermoplastic pavement  
marking materials—For use with surface  
applied glass beads**

This Australian Standard was prepared by Committee CH-003, Paints and Related Materials. It was approved on behalf of the Council of Standards Australia on 13 October 2004.  
This Standard was published on 21 January 2005.

---

The following are represented on Committee CH-003:

**AUSTROADS**

Australian Industry Group  
Australian Motorcycle Council  
Australian Paint Approval Scheme  
Australian Paint Manufacturers' Federation  
Main Roads Department, Queensland  
Master Painters Australia  
National Association of Testing Authorities Australia  
Road Marking Industry Association of Australia  
Surface Coatings Association Australia  
Telstra Corporation  
Water Corporation Western Australia

---

**Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.org.au](mailto:mail@standards.org.au), or write to the Chief Executive, Standards Australia, GPO Box 5420, Sydney, NSW 2001.

---

*This Standard was issued in draft form for comment as DR 02400.*

## PREFACE

This Standard was prepared by the Australian members of the Joint Australia/New Zealand Standards Committee CH-003, Paints and Related Materials. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian, rather than an Australian/New Zealand Standard.

This Standard supersedes AS 4049.2—1994, *Paints and related materials—Road marking materials—Thermoplastic road marking materials*.

This Standard is the second of three parts dealing with pavement marking materials. Other Standards in the AS 4049 Series are:

AS

4049 Paints and related materials—Pavement marking materials

4049.1 Part 1: Solvent-borne paint—For use with surface applied glass beads

4049.3 Part 3: Waterborne paint—For use with surface applied glass beads

This Standard provides mainly performance requirements for pavement marking materials but includes some compositional requirements.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

## CONTENTS

	<i>Page</i>
FOREWORD.....	4
1 SCOPE.....	5
2 OBJECTIVE .....	5
3 REFERENCED DOCUMENTS.....	5
4 DEFINITIONS.....	5
5 COMPOSITION OF MARKING MATERIAL .....	6
6 PROPERTIES OF THE THERMOPLASTIC MARKING MATERIAL .....	6
7 SAFETY REQUIREMENTS .....	7
8 FIELD TESTING.....	7
9 PACKAGING .....	8
10 LABELLING .....	8
APPENDICES	
A MEANS FOR DEMONSTRATING COMPLIANCE WITH THIS STANDARD .....	10
B GUIDANCE ON THE APPLICATION OF THERMOPLASTIC PAVEMENT MARKING MATERIAL .....	13
C LIST OF REFERENCED DOCUMENTS .....	16
D PREPARATION OF TEST MATERIAL.....	18
E DETERMINATION OF BINDER CONTENT .....	20
F DETERMINATION OF THE GRADING OF CONSTITUENTS AND GLASS BEAD CONTENT.....	25
G DETERMINATION OF THE LUMINANCE FACTOR .....	27
H DETERMINATION OF HEAT STABILITY OF THERMOPLASTIC MATERIAL .....	30
I DETERMINATION OF FLOW RESISTANCE.....	32
J DETERMINATION OF DENSITY OF THERMOPLASTIC PAVEMENT MARKING MATERIAL.....	34
K FIELD TESTS FOR THERMOPLASTIC PAVEMENT MARKING MATERIAL .....	36
L FIELD DETERMINATION OF SKID RESISTANCE (WET PENDULUM METHOD).....	39
M DETERMINATION OF RETROREFLECTIVITY .....	45
N DETERMINATION OF DEGREE OF WEAR.....	47
O PICTORIAL STANDARDS FOR DEPICTING VARIOUS DEGREES OF WEAR .....	49
