Australian/New Zealand Standard™

Occupational noise management

Part 2: Noise control management

AS/NZS 1269.2:2005

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee AV-003, Acoustics, Human Effects. It was approved on behalf of the Council of Standards Australia on 27 January 2005 and on behalf of the Council of Standards New Zealand on 11 February 2005.

This Standard was published on 6 April 2005.

The following are represented on Committee AV-003:

Association of Australian Acoustical Consultants

Association of Consulting Engineers Australia

Australian Acoustical Society

Australian Chamber of Commerce and Industry

National Acoustic Laboratories

Department of Consumer & Employment Protection, WorkSafe Division, W.A.

Department of Labour, New Zealand

N.S.W. Rural Fire Service

New South Wales Nurses Association

New Zealand Audiological Society

Royal Institution of Naval Architects

Safety Institute of Australia (Incorporated)

Victorian WorkCover Authority

WorkCover New South wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

AS/NZS 1269.2:2005

Australian/New Zealand Standard™

Occupational noise management

Part 2: Noise control management

Originated in Australia as part of AS 1269—1976. Previous edition AS/NZS 1269.2:1998. Second edition 2005.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee AV-003, Acoustics, Human Effects, to supersede, AS/NZS 1269.2:1998, Occupational noise management, Part 2: Noise control management.

This is Part 2 in a series of Standards as follows:

AS/NZS

1269	Occupational noise management		
1269.0	Part 0:	Overview and general requirements	
1269.1	Part 1:	Measurement and assessment of noise immission and exposure	
1269.2	Part 2:	Noise control management (this Standard)	
1269.3	Part 3:	Hearing protector program	
1269.4	Part 4:	Auditory assessment	

The objective of this series of Standards is to provide requirements and guidance on all facets of occupational noise management. It is recommended that the reader refer to all Parts of AS/NZS 1269 to better understand all relevant terminology and objectives of occupational noise management.

The objective of this Part is to give requirements and guidance on the management of noise control in workplaces. It provides procedures for noise control in existing workplaces as well as for incorporating noise control in the design of new workplaces.

The objective of this revision is to confirm the existing Standard with a few minor changes.

The guidance provided in this Standard is based on ISO 11690-1:1996, Acoustics—Recommended practice for the design of low-noise workplaces containing machinery, Part 1: Noise control strategies, ISO 11690-2:1996, Acoustics—Recommended practice for the design of low-noise workplaces containing machinery, Part 2: Noise control measures, National Occupational Health and Safety Commission (Worksafe Australia) documents and WorkSafe Western Australia documents.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.
