Australian/New Zealand Standard®

Information technology—Telecommunications and information exchange between systems—Private integrated services network—Specification, functional model and information flows—Identification supplementary services

AS/NZS 4477:1997

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT/16, Private Telecommunications Networking. It was approved on behalf of the Council of Standards Australia on 10 March 1997 and on behalf of the Council of Standards New Zealand on 7 March 1997. It was published on 5 June 1997.

The following interests are represented on Committee IT/16:

Airline interests, New Zealand

AUSTEL

Australia post

Australian Electrical and Electronic Manufacturers Association

Australian Telecommunications User Group

New Zealand Standards Committee SC605 WG1

N.S.W. Public Works and Services

Optus Communications, Australia

Telecom New Zealand

Telstra Corporation, Australia

Review of Standards. To keep abreast of progress in industry, Joint Australian/ New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 96533.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT/16, Private Telecommunications Networking.

This Standard is identical with, and has been reproduced from, ISO/IEC 14136:1995, *Information technology—Telecommunications and information exchange between systems—Private Integrated Services Network—Specification, functional model and information flows—Identification supplementary services*.

The objective of this Standard is to provide private integrated services network (PISN) designers and users with the specification for the identification supplementary service in order to allow a user involved in a call to receive information on the identity of the other user and to prevent the presentation of one's own number worldwide.

The Standard is one of a series of emerging ISO/IEC Standards applicable to private integrated services networking. The series uses the ISDN concepts as developed by ITU-T and is also within the framework of Standards for Open Systems Interconnection (OSI) as defined by ISO/IEC JTC 1.

Statements expressed in mandatory terms in notes to clauses are deemed to be requirements of this Standard.

Users of this Standard are advised by Standards Australia and Standards New Zealand, under arrangements made with ISO and IEC, as well as certain other Standards organizations, that the number of this Standard is not reproduced on each page; its identity is shown only on the cover, inside front cover and title pages.

The term 'informative' has been used in this Standard to define the application of the annex to which it applies. An 'informative' annex is only for information and guidance.

For the purpose of this Joint Standard, the ISO/IEC text should be modified as follows:

(a) *Terminology*   The words 'this Australian/New Zealand Standard' should replace the words 'this International Standard' wherever they appear.

(b) *References*   The references to international Standards should be replaced by references, where appropriate, to the following Australian/New Zealand Standards:

Reference to International Standard or other Publication		*Australian/New Zealand Standard*
