Reconfirmed 2023

Australian Standard[®]

Coal and coke—Analysis and testing

Part 24: Guide to the evaluation of measurements made by on-line coal analysers

This Australian Standard was prepared by Committee MN/1, Coal and Coke. It was approved on behalf of the Council of Standards Australia on 12 September 1997 and published on 5 January 1998.

The following interests are represented on Committee MN/1:

ACIRL

Australasian Institute of Mining and Metallurgy

Australian Coal Association

Australian Coal Preparation Society

Australian Institute of Energy

Bureau of Steel Manufacturers of Australia

Coalfield Geology Council of New South Wales

CSIRO, Division of Coal and Energy Technology

Department of Mines and Energy, Queensland

Electricity Supply Association of Australia

Institution of Engineers, Australia

Minerals Council of Australia

University of Newcastle

University of New South Wales

University of Queensland

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 95225.

RECONFIRMATION

OF

AS 1038.24—1998

Coal and coke—Analysis and testing

Part 24: Guide to the evaluation of measurements made by on-line coal analysers

RECONFIRMATION NOTICE

Technical Committee MN-001 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 27 October 2023.

The following are represented on Technical Committee MN-001:

Australian Coal Industry Reference Samples
Australian Coal Preparation Society
Australian Energy Council
CSIRO
Minerals Council of Australia
National Association of Testing Authorities Australia
The University of Queensland
University of New South Wales
University of Newcastle

PREFACE

This Standard was prepared by the Standards Australia Subcommittee on Coal Evaluation, in collaboration with the Subcommittee on Coal Sampling and under the supervision of the Committee on Coal and Coke.

In preparing this document, reference was made to the ISO working draft *Solid mineral fuels—Evaluation of the measurement performance of on-line analysers*, August 1995. Additionally, reference was made to the draft ASTM *Standard guide to the evaluation of measurements made by on-line analysers*, Draft #9, May 23, 1994.

The objective of this Standard is to provide users of on-line coal analysers with guidance to the interpretation of the measurements made, so that the performance of analysers, which offer significant benefits to the coal industry, can be evaluated.

The term 'informative' has been used in this Standard to define the application of the Appendices to which it applies. An 'informative' appendix is for information and guidance only.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
