

Australian Standard<sup>®</sup>

**Pre-engineered fire protection systems  
for cooking equipment**

This Australian Standard® was prepared by Committee FP-011, Special Hazard Fire Protection Systems. It was approved on behalf of the Council of Standards Australia on 16 June 2008.

This Standard was published on 8 August 2008.

---

The following are represented on Committee FP-011:

- Australian Industry Group
  - Australian Museum
  - CSIRO Materials Science and Engineering
  - Department of Defence
  - Engineers Australia
  - Fire Protection Association Australia
  - Institute of Security Executives
  - National Fire Industry Association
  - Society of Fire Protection Engineers Australasian Chapter
- 

This Standard was issued in draft form for comment as DR 07229.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

---

### **Keeping Standards up-to-date**

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **[www.standards.org.au](http://www.standards.org.au)**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **[mail@standards.org.au](mailto:mail@standards.org.au)**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee FP-011, Special Hazard Fire Protection System, to supersede AS 3772—1990, *Fire protection of cooking areas*.

The objective of the Standard is to cover the requirements for pre-engineered fire protection systems used to protect cooking appliances and ancillary hoods and ductwork.

This revision has been developed to accommodate changes in cooking equipment technology and practices, including the use of vegetable based cooking oils with higher auto-ignition temperatures and improved cooker insulation. These changes have necessitated the development of new fire testing protocols. While this Standard has been developed with wet chemical systems as the main focus, it does not preclude the use of other agents, provided they satisfy the requirements of this Standard.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative appendix is only for information and guidance.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

*This Standard incorporates a Commentary on some clauses. The Commentary directly follows the relevant clause, is designated by ‘C’ preceding the clause number and is printed in italics in a panel. The commentary is for information only and does not need to be followed for compliance with this Standard.*

## CONTENTS

	<i>Page</i>
<b>SECTION 1 SCOPE AND GENERAL</b>	
1.1 SCOPE .....	5
1.2 NORMATIVE REFERENCES .....	5
1.3 DEFINITIONS .....	6
1.4 WET CHEMICAL SYSTEMS .....	7
1.5 COMPETENCIES .....	7
<b>SECTION 2 SAFETY REQUIREMENTS</b>	
2.1 EMERGENCY PROCEDURES .....	8
2.2 SIGNS AND WARNING NOTICES .....	8
2.3 FIRE EXTINGUISHERS .....	9
2.4 FIRE BLANKETS .....	10
<b>SECTION 3 DOCUMENTATION</b>	
3.1 GENERAL .....	11
3.2 IDENTIFICATION .....	11
3.3 DESIGN .....	11
3.4 PLANS .....	12
3.5 COMMISSIONING .....	12
3.6 SYSTEM OWNER'S MANUAL .....	13
<b>SECTION 4 SYSTEM DESIGN</b>	
4.1 GENERAL .....	14
4.2 APPROVAL OF COMPONENTS .....	14
4.3 MOVEABLE COOKING APPLIANCES .....	14
4.4 DESIGN AND CALCULATIONS .....	15
4.5 EXTINGUISHING AGENT QUANTITY .....	16
4.6 FUEL SHUT-OFF .....	16
4.7 COMPONENTS .....	16
<b>SECTION 5 SUPPLY</b>	
5.1 EXTINGUISHING AGENT .....	17
5.2 STORAGE CONTAINERS .....	17
<b>SECTION 6 DISTRIBUTION SYSTEMS</b>	
6.1 GENERAL .....	18
6.2 PIPEWORK .....	18
6.3 NOZZLES .....	18
<b>SECTION 7 DETECTION, ACTUATION AND CONTROLS</b>	
7.1 GENERAL .....	20
7.2 ELECTRICAL WIRING AND EQUIPMENT .....	20
7.3 DETECTION .....	20
7.4 SYSTEM ACTUATION .....	20
7.5 CONTROL AND INDICATING EQUIPMENT .....	21
