

Australian/New Zealand Standard™

**Spray painting booths, designated spray painting areas and paint mixing rooms**

**Part 1: Design, construction and testing**

### **AS/NZS 4114.1:2003**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-014, Electrical Equipment in Hazardous Areas. It was approved on behalf of the Council of Standards Australia on 30 December 2002 and on behalf of the Council of Standards New Zealand on 13 December 2002. It was published on 11 February 2003.

---

The following are represented on Committee EL-014:

Association of Consulting Engineers Australia  
Auckland Regional Chamber of Commerce  
Australian Association of Certification Bodies  
Australian Chamber of Commerce and Industry  
Australian Coal Association  
Australian Electrical and Electronic Manufacturers Association  
Australian Gas Association  
Australian Industry Group  
Australian Institute of Petroleum  
Australian Institute of Refrigeration Air Conditioning and Heating  
Department of Mineral Resources, N.S.W.  
Department of Mines and Energy, Qld  
Electricity Supply Association of Australia  
Institute of Electrical Inspectors  
Institute of Instrumentation and Control Australia  
Institution of Engineers Australia  
Ministry of Economic Development (New Zealand)  
National Electrical and Communications Association  
New Zealand Association of Marine, Aviation and Power Engineers  
New Zealand Employers and Manufacturers Association  
New Zealand Hazardous Areas Electrical Coordinating Committee  
Regulatory authorities (electrical)  
WorkCover New South Wales

#### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-014, Electrical Equipment in Hazardous Areas to supersede AS/NZS 4114.1:1995, *Spray painting booths*, Part 1: *Design, construction and testing*.

This Standard is intended for the guidance of manufacturers, designers, users, statutory authorities and others associated with the construction of spray painting booths.

Major changes to the 1995 edition incorporated in this revised edition are based on industry comments received and are as follows:

- (a) The title was reviewed and reads '*Spray painting booths, designated spray painting areas and paint mixing rooms*'.
- (b) New definitions were added.
- (c) Diagrams for the different airflow systems (Clause 1.6) were added.
- (d) Diagrams for external exhaust fans (Clause 2.10) were added.
- (e) Infrared heating (Clause 3.4.5) was added.
- (f) Diagrams for examples of air supply/exhaust systems (Clause 4.2.2.1) were added.
- (g) Spray cycle airflow rates (Clause 4.2.2.3) were fully reviewed.
- (h) Clause 5.3.2—*System requirements* was substantially expanded to include detailed requirements for heat exchangers and heat exchanger flues.
- (i) Method to determine airflow velocity (Clause 7.5) was added.
- (j) Appendix A—*Relevant authorities* was updated.
- (k) A new Appendix B—*Paint mixing rooms* was added; it contains all the requirements for the different types of such rooms.

This Standard is Part One of a Series which consists of the following:

## AS/NZS

4114	Spray painting booths, designated spray painting areas and paint mixing rooms
4114.1	Part 1: Design, construction and testing (this Standard)
4114.2	Part 2: Selection, installation and maintenance

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

## CONTENTS

	<i>Page</i>
<b>SECTION 1 SCOPE AND GENERAL</b>	
1.1 SCOPE .....	5
1.2 APPLICATION.....	5
1.3 REFERENCED DOCUMENTS .....	6
1.4 DEFINITIONS.....	6
1.5 TYPES OF SPRAY PAINTING BOOTHS .....	7
1.6 AIRFLOW SYSTEMS .....	8
1.7 CLASSIFICATION OF HAZARDOUS AREAS .....	9
<b>SECTION 2 DESIGN AND CONSTRUCTION</b>	
2.1 GENERAL.....	11
2.2 MATERIALS.....	11
2.3 INTERIOR SURFACES .....	11
2.4 EXPANSION .....	11
2.5 DOORS .....	11
2.6 ENTRY/EXIT OF TUNNEL OR PRODUCTION BOOTHS.....	11
2.7 GUARDING OF MOVING PARTS .....	11
2.8 SHELVES .....	12
2.9 EQUIPOTENTIAL BONDING.....	12
2.10 DUCTS .....	12
<b>SECTION 3 SPECIFIC REQUIREMENTS</b>	
3.1 GENERAL .....	14
3.2 OPERATION .....	14
3.3 BOOTH CONSTRUCTION.....	14
3.4 ELECTRICAL APPARATUS.....	15
<b>SECTION 4 VENTILATION OF SPRAY PAINTING BOOTHS</b>	
4.1 GENERAL .....	17
4.2 AIRFLOW .....	17
4.3 CONTROL SYSTEMS .....	20
4.4 EXHAUST AIR .....	20
<b>SECTION 5 SPRAY PAINTING BOOTH OPERATION</b>	
5.1 GENERAL .....	22
5.2 CYCLE .....	22
5.3 HEATING SYSTEM.....	22
<b>SECTION 6 MARKINGS</b>	
6.1 GENERAL .....	25
6.2 ADDITIONAL INFORMATION.....	25
6.3 WARNING SIGN .....	25
<b>SECTION 7 VERIFICATION AND TESTS</b>	
7.1 GENERAL .....	26
7.2 VERIFICATION OF DOCUMENTS AND DESIGN .....	26
7.3 RUNNING TEST.....	26
7.4 VENTILATION SYSTEM TEST .....	26
7.5 AIRFLOW TESTING .....	26
